The Liquidshop 1.0

January 17, 2021

Welcome to the first Liquidsoap workshop!

January 17th, 2021

Tired of waiting? Try http://meet.liquidsoap.info/

From a student project to an exciting community

Liquidsoap all started as a student project in ~2004 (see David's talk):

From a student project to an exciting community

It is now a rich language packed with tons of features (see Romain's talk):

- most functions are defined inside the language and thus highly customisable
- we support most current audio and video formats, streaming (HLS), etc.
- we support manipulation of encoded streams

used by many people

- radios: Radio France, BMIR, Datafruits.fm, RaBe, . . .
- streaming services: live365, SharpStream, . . .

with

- outside contributions: Showergel, . . .
- many more!

Organization

The conference will take place at `bbb.liquidsoap.info`:

- feel free to ask questions
- open your mics and cams when asking questions (only)
- speakers, please send me your presentations in advance

The breaks will take place at `meet.liquidsoap.info`:

- turn on your webcams and microphones
- there are paces which open jitsi sessions
- please get back to the talks in time

Ping me or Romain in case you have any problem.

<p align="center">Have a nice workshop!</p>
